

Melt more in less time. With less power.

Inductotherm Steel Frame Furnaces are designed for efficiency, and that means more profit from every melt. The thick-walled tubing of the furnace coil directs more energy into the melting process. An optional easy-close cover reduces heat loss to give you more efficient melting than typical competitive frame furnaces. On top of that, your furnace comes with easy access features and legendary Inductotherm durability, including a rugged steel frame to maximize lining life. It all adds up to one extraordinary steel frame furnace—from the melting experts at Inductotherm.
