

Connect with your equipment's data.

Today, our industry is driven by information and our desire to be connected to it. Embedded sensors and connected equipment bring important decision-making data directly to you. Using our wide range of advanced melt shop control and diagnostics systems, plant managers and owners are better equipped to make real-time adjustments. This allows you to boost productivity, reduce excess costs and eliminate errors to help your foundry or melt shop create more high-quality and precisely cast parts. Reach out to us today to find out how you can put our advanced melting and heating technologies to work for you. Inductotherm stands ready to support you.
